

TranSTAR TRANSPORTER

1/8 HP 90 Watt
Motor

The TranSTAR transporter is designed for inspecting 6 to 30 inch sanitary or storm drain pipelines. At less than 19 inches long, the TranSTAR transporter easily fits in most manhole situations. The tremendous power generated by the Rare-Earth permanent magnet motor drives six gear driven wheels achieving speeds up to 65 feet per minute. The TranSTAR transporter has a quick change gear feature for increasing the torque when running optional large diameter tires. Weighing in at just 25 lbs. the TranSTAR transporter is easy to work with and comes with a ballast plate for increasing performance when needed.

Features

- ✚ Less than 19 inches long
- ✚ Rare-Earth magnet motor with planetary gear train
- ✚ 25 to 65 ft. per minute
- ✚ Quick change gear sets for use with optional wheels
- ✚ Allows inspection of line sizes from 6" to 30"
- ✚ Water resistant per IPX7 requirements
- ✚ All wheel drive for maximum pulling power
