

URS1

Universal Roller Skid for 6" to 12" Lines

Easily adapt your portable video inspection system for use in 6"-12" and larger pipelines. This unique device accepts most standard push cameras under 2 inches diameter. The universal roller skid is constructed of lightweight, durable, corrosion resistant composite nylon.

Three pivoting arms dynamically adjust to fit the required diameter, keeping the camera head centered in the pipeline at all times. No extra parts, tools or manual adjustments are required. Six rugged nylon wheels allow the skid to roll easily through the pipe. Larger diameter wheels are available for larger pipeline applications.

Optional auxiliary flashlights are available to provide extra lighting. Each watertight flashlight provides 6,000 candlepower and mounts securely to the roller skid. Or, if desired, the roller skid provides general mounting for up to three flashlights. A safety harness comes standard for secondary/emergency retrieval.

This innovative video inspection system accessory will allow you to use your portable video inspection system in applications that previously required expensive tractor systems. The Universal Roller Skid comes with a 2-year warranty.

URS4

Mini Roller Skid for 4" to 6" Lines

Based on user response to the Universal Roller Skid for 6"-12" pipelines, RABCO has developed the Mini URS for 4"-6" pipelines. The Mini URS keeps your camera centered in the pipeline and protects it from wear and tear. Eight wheels mounted on the skid allow the camera to roll easily in 4" and 6" pipelines. The Mini URS easily negotiates 90 degree bends.

The Mini URS is constructed of the same lightweight, durable, corrosion resistant composite nylon as the larger version. It provides a protective housing that increases camera lifetime. The Mini Roller Skid comes with a 2-year warranty.

Stealth Light Kit

Part No: URS1-S

Popular with firefighters and adventure seekers. The unique easy slide thumb switch on the StealthLite 2400 is easy to operate, even with gloves. The tough resin body is corrosion proof and resistant to extreme temperatures. The Xenon lamp is powered by 4 AA alkaline cells (included) for a bright beam that penetrates thick smoke, fog, and dust. Attach the StealthLite to one of our optional helmet light holder clips and you have a hands-free light for work or play. Submersible to 500 feet.
