

RS Technical Training

3T Equipment hosted an RST service training school in Petaluma, California on March 17 &18. We had a terrific turn out of 50 plus participants.

Bob Grenier (RST National Sales Manager) presented the class with help from Chris Remillard (RST Inside Sales). Bob gave a comprehensive class covering all aspects of repairs from fixing cable to changing light bulbs in your camera.

RST had staff on site both days to look at customer equipment and answer any questions specific to the customers unit.

3T took care of all hunger needs with a great Italian lunch on Monday and a Tim Kennedy grilled tri-tip and chicken lunch on Tuesday as well as lots of snack foods, drinks and morning coffee.

If you missed this class another will be scheduled for Southern California later in the year. We look forward to seeing you there.
