

“Skinny Winnie” Manhole Ladder

HERE AT LAST

YOUR LADDER TO SUCCESS!

DESIGNED WITH YOU IN MIND

Climb up in production with a safe decent ladder.

This safe space and time saver ladder is a “snap” to open. It will slip into a 24 inch manhole and quickly “snap” shut to allow maximum work area for you while working below the surface.

It is constructed of strong tubular aluminum and is available in wood for use where electrical contact is a hazard.

Available Sizes: 8ft, 10ft, 12ft, 14ft.

Amazingly it opens to a comfortable 12 inch rung for working but requires only 3 ¼” for storing or when carrying.
